

❖ DMD MOTORIZED DAMPER

Constructed of galvanized steel sheet, rectangular shaped, high strength structure, flange type. Linkage designed to be outside of the airstream (concealed in frame). Blade(s) can be controlled automatically by electric actuator from fully open to fully close in opposed blade pattern for high effectiveness in air volume control performance. Suitable for mounting to duct lines, building sidewalls or shafts to control volume of supply, exhaust, fresh or pressurized air automatically. Electric actuator is an optional item. Max single section's dimension are up to 800x800mm only. Larger sizes are constructed of factory joined multiple sections.

❖ DMD ORDER KEY INFORMATION

DMD - S - C

Joint	Slip Joint (C), Flange Joint (F)
Material	Steel (S), Stainless Steel (SUS), Aluminum Zinc (AZ)
Model	DMD - Motorized Damper
